Safety Tank System

Double wall tanks by Dehoust

▪ With integrated collecting basin

UL US LISTED

All advantages at a glance

- Installation without masonry and oil-proof coating
- Optimal space utilization
- Bracket tightly screwed to the tank, enabling transport by means of high-lift truck, hence easy installation of the tank system
- Two different heights, suited for basements with different headrooms
- Leakage indicator and gauge
- Two-side galvanized steel sheet, tightly welded and edged by means of the most up-to-date machines
- Easy transport inside the cellar
- Easy transport by standard carrying handles
- High Quality Polyethylene with diffusion barrier (PE-PLUS)
- For individual or multiple tank installation
